

# United Way of Lee County Student Health Fund

United Way Student Health Fund is a program that can help pay for medical or dental needs of uninsured students enrolled in Auburn City Schools, Lee County Schools or Opelika City Schools. Routine cleanings and physicals are not eligible to receive funds and UWLC must receive a referral from the school system or DHR. This year, we provided a grant to support the mental health coordinators in Auburn City Schools, Lee County Schools, and Opelika City Schools.

As a former teacher, I can attest to how important all of these tools are in a school setting. It is often forgotten how much the social/emotional/mental component supports the academic component, and I think the students will greatly benefit in all of these areas from having these tools available to them in their academic environments.
